ecosystem

eGBP FINANCIAL ECOSYSTEM

The eGBP Regulated Stablecoin enables a diverse financial ecosystem – that critically segregates the stablecoin from the ecosystem products built that use the stablecoin

eGBP Regulated Stablecoin

UK Regulated Fiat-Backed Stablecoin - eGBP

- Backed by low-risk, liquid, secure instruments and cash deposits - to protect users
- Backing assets held in trust – for the benefit of users
- eGBP redemption for fiat at par, by end of next UK business day
- No yield paid to users from backing assets

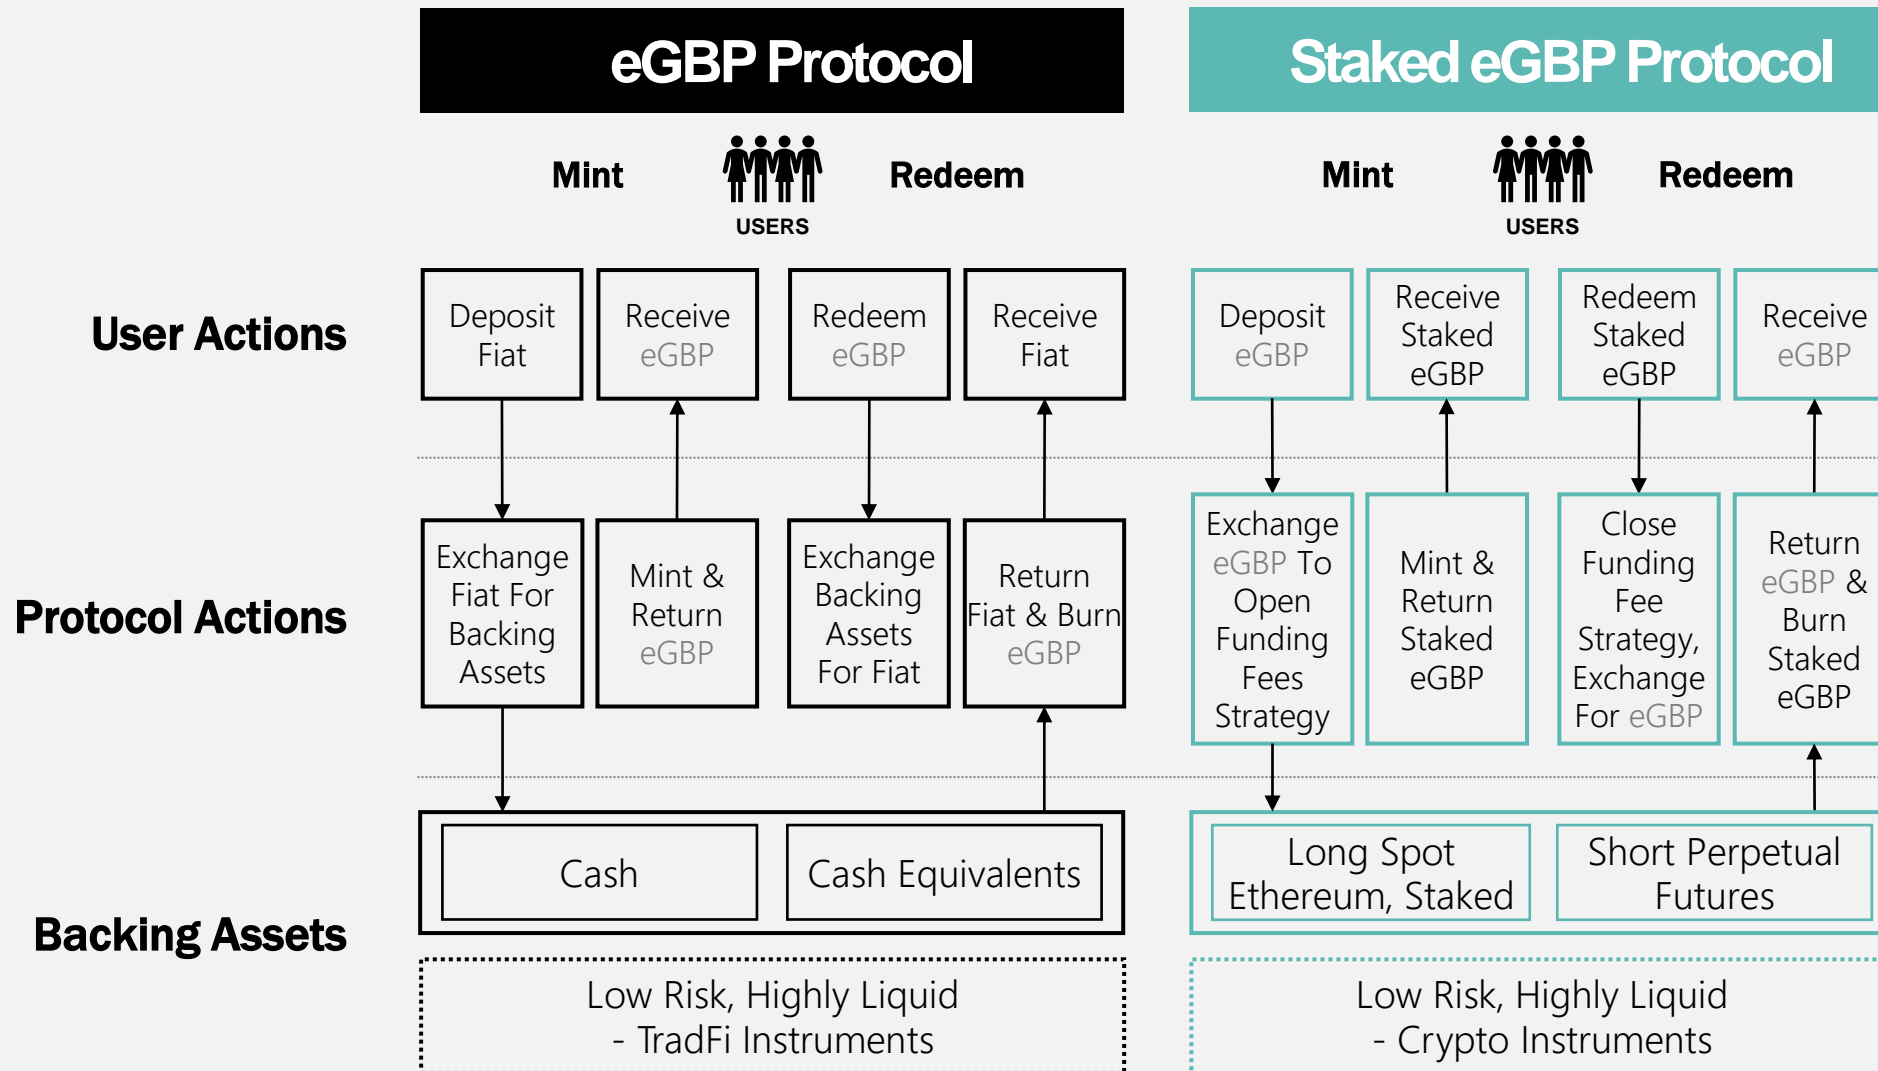

Example: Ecosystem Product

Yield Generation Product – Staked eGBP

- An ecosystem product built using eGBP
- Users deposit eGBP and receive staked eGBP, which represents their deposit
- Product exchanges eGBP for crypto to generate yield using a funding fee arbitrage strategy
- Yield paid to users
- Staked eGBP redeemable for eGBP

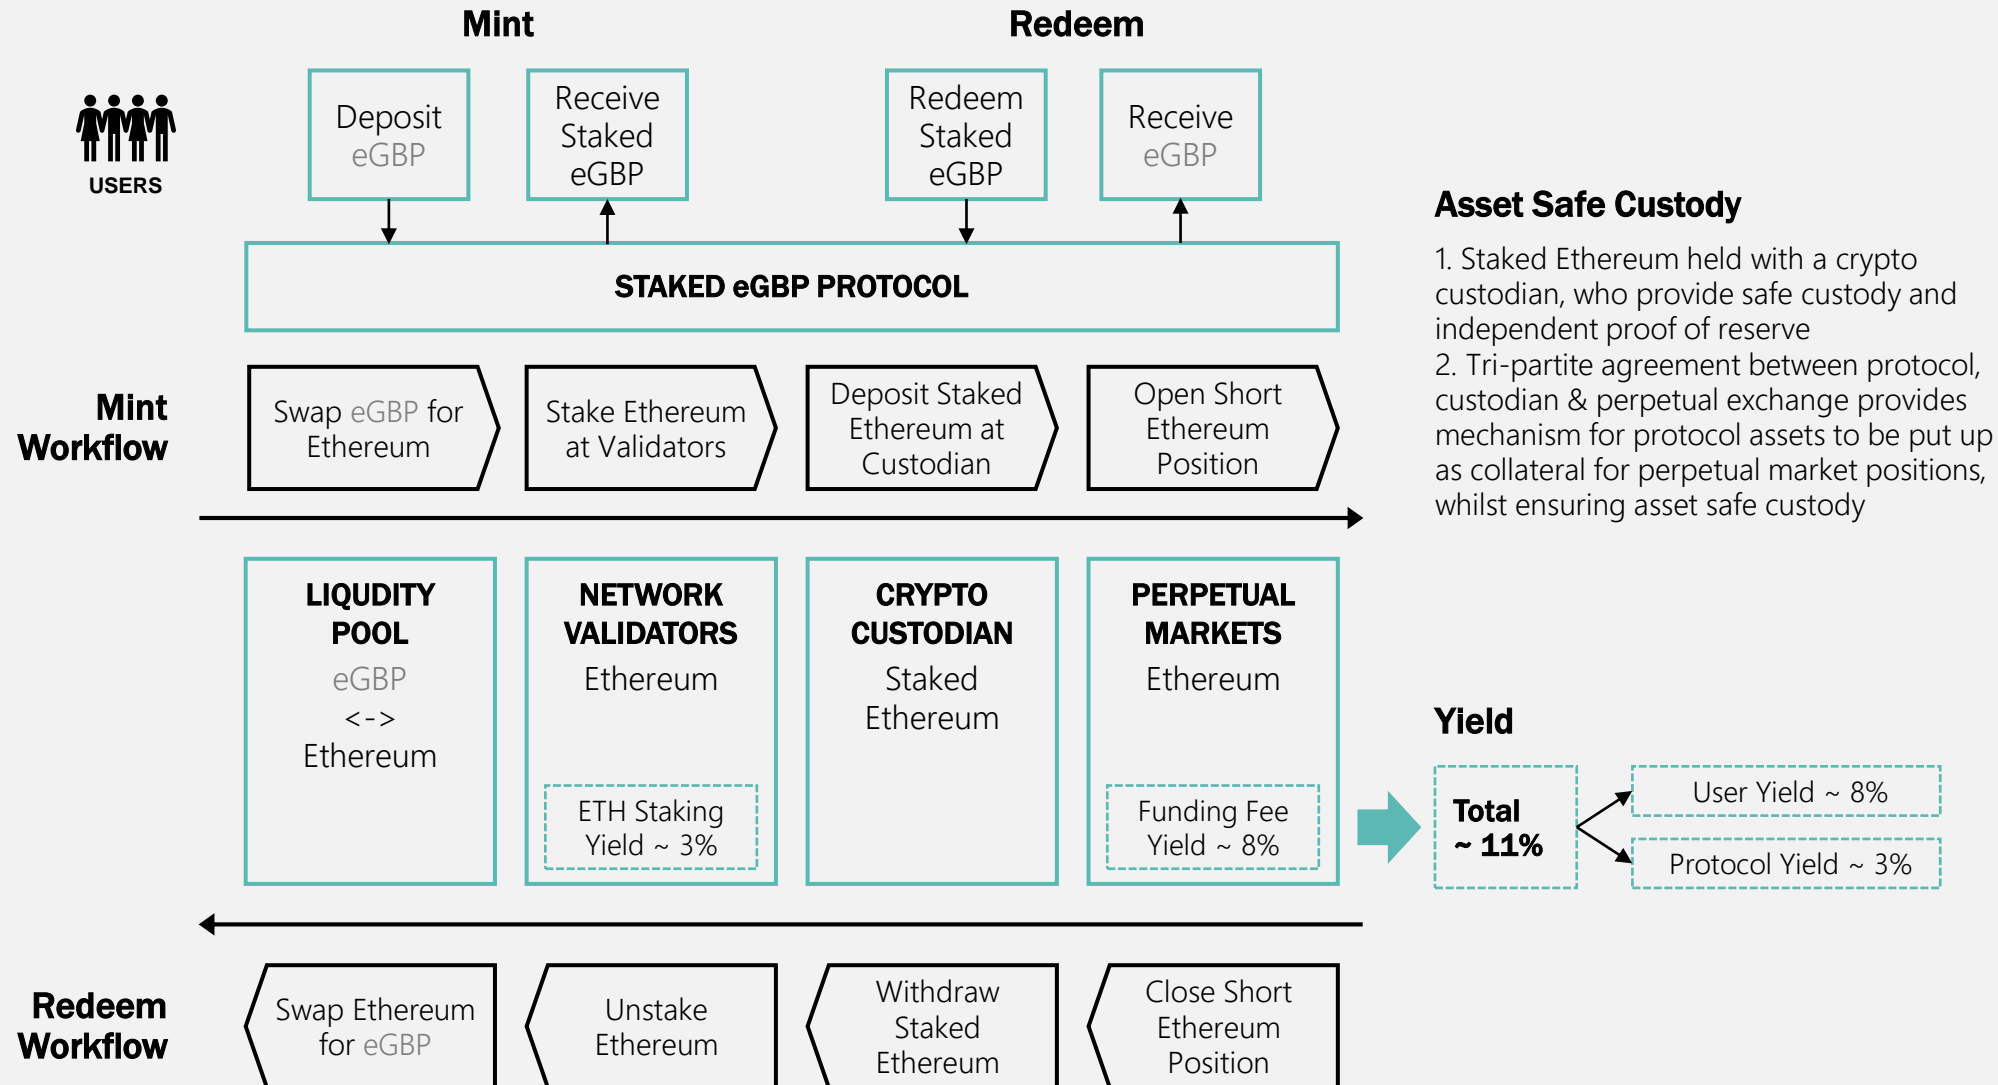

eGBP & STAKED eGBP - MINT & REDEEM MECHANICS

User Mint & Redeem Mechanics

STAKED eGBP - YIELD & ASSET SAFE CUSTODY

Yield Generation & Asset Safe Custody Strategy With Proof of Reserves

Asset Safe Custody

1. Staked Ethereum held with a crypto custodian, who provide safe custody and independent proof of reserve
2. Tri-partite agreement between protocol, custodian & perpetual exchange provides mechanism for protocol assets to be put up as collateral for perpetual market positions, whilst ensuring asset safe custody
